

26 November 2019

Information - Public and Private Schools for distribution regarding measles outbreak.

Public and Private schools update article	
Publication date	26/11/2019
Headline 70 characters with spaces	Important information about Measles and travel.
Content 50 words	<p>Measles remains a concern. The Pacific region (including NZ) is affected, along with many other countries.</p> <p>With the holiday travel season upon us, please make sure you are fully vaccinated against measles before travelling.</p> <p>The measles-mumps-rubella (MMR) vaccine is free through your doctor or immunisation provider for anyone born during or since 1966 who has not already had two doses. Babies travelling to affected countries can receive MMR vaccine from 6 months of age; however, they still require a dose of measles-containing vaccine at 12 months and another dose at 18 months of age.</p> <p>For more information visit the Queensland Health website or call 13HEALTH.</p>

School newsletter, social media and website	
Publication date	8/11/2019
Headline 70 characters with spaces	Travelling overseas this summer? Get vaccinated against measles
Content 100 words	<p>Measles remains a concern, with cases originating from overseas travellers. The Pacific region (including NZ) is particularly affected, along with many other countries.</p> <p>With the holiday travel season upon us, please make sure you are fully vaccinated against measles before travelling.</p> <p>The measles-mumps-rubella (MMR) vaccine is free through your doctor or immunisation provider for anyone born during or since 1966 who has not already had two doses.
